Ali Raza

Full-Stack Developer · NetSuite & Shopify Integrations

SUMMARY

Full-stack developer shipping production e-commerce code since 2017, specializing in **NetSuite ERP integrations** and **Shopify**. I built and run the Shopify ↔ NetSuite middleware for ProLon / L-Nutra, which moves orders, deposits, refunds, fulfillments and payouts between Shopify, NetSuite, 3PLs, Amazon and Stripe. I also maintain the company's SuiteScript 2.x customizations. Before that I built Shopify Plus stores and Shopify apps for D2C brands, with **4.9/5 on Upwork from 175 reviews** across 235 jobs.

EXPERIENCE

Integration Manager — NetSuite & Shopify

2024 – Present

L-Nutra, Inc.

- Built and own a **Shopify ↔ NetSuite integration platform** (Next.js, TypeScript, background jobs) that syncs orders, payments, invoices, refunds and fulfillments in both directions.
- Connect subscription, marketplace, payment and 3PL systems to NetSuite using **SuiteTalk REST, SuiteQL** and token-based authentication, with reconciliation reporting.
- Implement complex order logic: subscriptions, kits and bundles, tax and discount mapping, and accounting segments.
- Make syncs idempotent and self-healing with duplicate prevention and automatic retries.
- Write and maintain **SuiteScript 2.x** customizations with SDF: User Event, Map/Reduce, Scheduled, Suitelet and RESTlet scripts.

Technologies: NetSuite, SuiteScript 2.x, SuiteQL, SuiteTalk REST API, SDF, Shopify Admin GraphQL API, Next.js, TypeScript, Node.js

Founder & Full-Stack Developer

2018 – Present

ConversionsKing · Dubai, UAE

- Built **MoxieLash** from scratch on a custom Shopify Plus theme and scaled a brand-new product category to an **8-figure DTC business**.
- Revamped the **ProLon** storefront (conversion path, subscription flow, front-end speed) and built the **L-Nutra Health** flagship and a patient meal-delivery portal with dietary logic for **Nutrition for Longevity**.
- Ran a funnel restructure and iterative **A/B testing program** for Motive Health (FDA-cleared device). Built a cake configurator with in-cart fulfillment rules for Freedom Bakery, and did rebuilds for FriendshipCollar, Moxie and OutcomeMD.
- Built and published two apps on the **Shopify App Store**, plus a SwiftUI macOS app and two browser extensions.

Technologies: Shopify Plus, Liquid, Online Store 2.0, Shopify apps (Polaris, App Bridge), React, Next.js, Remix, Node.js, PostgreSQL, Supabase, Vercel AI SDK, SwiftUI

Senior Web Developer · Freelance

2017 – Present

Infinity Creatives LLC · Upwork — 235 jobs, 1,600+ hours, 4.9/5 (175 reviews)

- Built a custom **Shopify app** for choosing pick-up, local delivery or shipping, and supported it for almost four years (2019–2023, 5.0★): *“Ali is very good at his craft and was able to accomplish what we wanted to do.”*
- Built **Auto Disc Pro**, an automatic-discount Shopify app (2020–2021), a Shopify point-of-sale MVP for **Discount Trade For Share** (2017–2019), and a product-walkthrough app for a custom theme (2018–2019).
- Built Shopify app UI in **React and Polaris** alongside a client’s lead developer (2018–2019, 5.0★).

Technologies: Shopify, Shopify apps, React, Polaris, Node.js, JavaScript, Liquid, HTML5, CSS

PROJECT HISTORY

netsuite-shopify-sync
`Open source · NetSuite`
TypeScript toolkit: token-based auth, SuiteQL paging, idempotent upserts, kit-aware order mapping. github.com/princeali7/netsuite-shopify-sync

King Cart — Cart & Upsell
`Shopify App Store`
Slide-out cart with upsells, free-gift perks, AI product suggestions and progress bars.

Product Blocks
`Shopify App Store`
Online Store 2.0 blocks for trust badges, reviews and countdowns. No code needed.

Reels Grabber
`macOS · SwiftUI`
Bulk backup of Instagram and Facebook reels with quality picker and date filters.

WA Translator
`Chrome extension`
Inline, on-device translation of WhatsApp Web messages.

Superar
`Browser extension`
Custom shortcuts, JavaScript and CSS on any site. Privacy-first, no backend.
